Summary

Self-taught junior frontend developer with hands-on experience building modern, responsive web applications using React, Next.js, and TypeScript. Skilled in writing clean, maintainable code, integrating APIs, and implementing user-friendly designs. Passionate about problem-solving, learning new technologies, and contributing to impactful projects.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, React Query, Tailwind CSS, shadcn/ui

Backend: Node.js, Express.js

Databases: MongoDB

Tools & Other: Git, REST APIs, Zod, JWT authentication, Leaflet, React Datepicker

Projects

StayNest – Full-stack property listing platform (In Progress)

- Developed a fully responsive UI using Next.js, React Query, and Tailwind CSS.

- Implemented secure authentication with JWT and HTTP-only cookies.

- Designed and validated forms with Zod for listing creation and editing.

- Integrated Leaflet map for real-time location selection.

- Built a backend using Express.js, TypeScript, and MongoDB to handle listings, drafts, and user profiles.

Tickly – Ticketing system for events (In Progress)

- Built an admin dashboard for managing events, sections, and ticket types.

- Developed CRUD operations using React Query for seamless UI updates.

- Designed a clear purchase flow focusing on usability and performance.

Other Experience & Strengths

- Strong understanding of state management using React Query, avoiding unnecessary local state.

- Experienced in app architecture planning and preventing race conditions in data fetching.

- Comfortable working with both frontend and backend, from database design to UI.

- Motivated self-learner with a focus on building real-world, production-grade applications.
